Purposes of the
Sisters of Mary of Banneux, Inc.

- (a) To establish, operate and maintain a child welfare program for the care and education of underprivileged children, especially orphaned and abandoned children and street children, and to provide a free medical service program for the poorest of the poor;
- (b) To set-up, supervise and maintain a shelter for the destitute and the homeless, the care and rehabilitation of mendicants and the mentally or physically handicapped and shelter for unwed mothers;
- (c) To establish, provide and maintain a medical service program that will extend health and medical services to the above beneficiaries; and
- (d) To devise and maintain other programs to assist and serve the poorest of the poor.

Article 2 of the Constitutions of The Sisters of Mary defines their purpose as following Christ more fervently in prayer and more closely proclaiming the Kingdom of God particularly in doing good to people, concretely in terms of educational/vocational welfare of the underprivileged children or youth, medical care to the sick and the dying, shelter service to the homeless and the helpless.

THE SISTERS OF MARY South Korea

The Sisters of Mary will renovate an empty dormitory building in Pusan, South Korea into a Nursing Home for the aging Sisters and other poor elderly women.

The average age of the Sisters in Korea is 73 years old this year. In five years, 50% of Korean Sisters will be over 80 years old. This situation makes it necessary that proper care and assistance are in place.

The planned Nursing Home will also welcome poor elderly women who cannot afford to pay a good nursing home.

This year, funds for this project have been provided by the funding office in the USA.

CAVITE and CEBU, Philippines

The education with welfare programs in the Philippines continue to provide temporary shelter and junior to senior high school education with specializations in different vocational trainings to boys and girls from the poorest of the poor families aged between 12-18 years old. Students engage in a comprehensive curriculum that includes 4 years of Junior High School and 2 years of Senior High School. The schools focus on technical vocational education to ensure that graduates possess the hands-on experience and vocation expertise needed to excel in their career paths so that they can make significant contributions to society. Male out-of-school youth undergo classes in General Trias to prepare them for an acceleration examination to be eligible for a high-school diploma. Technical courses are integrated in these classes as well to further qualify the graduates for jobs.

Out-patient medical care for the nearby poor and the students is provided by the infirmaries.
